Granicus, St. Paul, MN — *VP of Software Engineering*

January 2019 - present

As Vice President of Software Engineering, I am responsible for the management and output of a global team of software engineers and report directly to a C-level executive. Duties include staff planning and development, budget planning and forecast, reporting on development metrics, performance assessments, coordination with security and compliance teams, training development, due diligence, and vendor relationship management.

Granicus, St. Paul, MN — *Director of Software Engineering*

November 2016 - January 2019

As director, I managed a team of about 20 software engineers and DBAs and reported directly to a C-level exec. I established a management structure to sustain growth on the team. I led a team that generated metrics for engineering productivity that were meaningful for executives and other stakeholders. I worked to improve individual performance using industry best-practices. I represented software development concerns with stakeholders (including product, security, and operations).

GovDelivery, St. Paul, MN — *Software Architect*

April 2014 - November 2016

As an architect I served as team lead on several scrum teams, delivering high quality software while advancing the strategic technical direction of the platform. I was a champion of the team's values - TDD, collective ownership, Agile/Scrum, and sustainable pace. I researched, implemented, and promoted the use of the company's streaming architecture.

GovDelivery, St. Paul, MN — *Senior Software Engineer*

January 2009 - April 2014

As part of a small but growing agile dev team, I helped to rewrite the company's legacy system into a modern, test-driven application. I also designed and built a few other new applications as new products were created. I was the leader of a devops team that established automated host configuration and provisioning.

Internet Broadcasting Systems, St. Paul, MN - *Senior Web Developer*

December, 2005 - December, 2008

Fisher Real Estate, LLLP, Baltimore, MD - *Web Developer*

May 2002 - December 2005

EDUCATION

Peabody Conservatory, Johns Hopkins University, Baltimore, MD — *MM*

With honors in Music Composition, 2003

Tulane University, New Orleans, LA — *BFA*

Cum laude with honors in Music Composition, 2001

I'm a software leader with experience growing small, startup-sized teams to large teams with battle-tested practices.

I'm an experienced Agile practitioner, particularly in Scrum. I'm a proponent of Test-Driven Development, collective ownership, psychological safety, and sustainable pace.

I have the most experience with Ruby, Java, SQL, JavaScript, Linux shell, HTML & CSS, Git, Puppet, Redis, and Kafka.

My software background is in full-stack web development, devops, databases, services & APIs, web applications, and front-end coding.
